LinkedIn: **linkedin.com/in/sushobhitkumar-sre**

PROFESSIONAL SUMMARY

Site Reliability Engineer with 5+ years of comprehensive experience supporting and optimizing critical production systems in high-stakes banking environments. Skilled in Linux administration, AWS infrastructure, incident management, root cause analysis (RCA), production deployment, change management, monitoring, automation, and CI/CD support. Proven track record in managing high-availability microservices and enhancing system reliability.

CORE COMPETENCIES

Incident Management | **Root Cause Analysis (RCA)** | **Production Deployment** | **Change Management** | **Production Support** | **Monitoring & Alerting** | **Linux Administration** | **API Gateway Management** | **Troubleshooting** | **Release Support**

TECHNICAL SKILLS

- **Operating Systems:** Linux (RHEL, CentOS, Ubuntu)
- **Cloud & Infrastructure:** AWS (EC2, IAM, S3, VPC, Load Balancer, CloudWatch, Auto Scaling)
- **Web & API:** NGINX Reverse Proxy, Kong API Gateway, REST APIs
- **Monitoring:** ELK Stack, Grafana, Prometheus, Kibana, Elastic APM
- **Databases:** Oracle, MySQL, Redis, Aerospike
- **Messaging:** Apache Kafka, Confluent Kafka
- **CI/CD & Automation:** Jenkins, Git, Bitbucket, Ansible, Shell Scripting (Bash), Python (Basic)
- **Security:** HashiCorp Vault
- **Tools:** Zoho ServiceDesk Plus (SDP), JIRA, ServiceNow, Confluence, Microsoft Teams

PROFESSIONAL EXPERIENCE

Site Reliability Engineer – Nehish Software Solutions (Airtel Payments Bank Project)

Dec 2022 – Present

- Provide L2/L3 production support for critical banking applications running on Linux and AWS infrastructure.
- Developed and implemented a Production Connectivity Framework for automated end-to-end production connectivity validation across multiple source and destination servers via Jenkins.
- Monitor application performance using Grafana, Kibana, ELK Stack, Prometheus, and Elastic APM.
- Perform incident management, ticketing, and troubleshooting using Zoho ServiceDesk Plus (SDP), ServiceNow, and JIRA.
- Manage and troubleshoot NGINX reverse proxy and Kong API Gateway for API traffic routing.
- Support high-availability microservices integrated with Oracle, Redis, Aerospike, and Kafka.

- Develop automation scripts using Shell scripting and Ansible for operational activities.
- Support Jenkins-based CI/CD deployments, release activities, and change implementation.
- Integrate and manage HashiCorp Vault for secure secret management.
- Coordinate with development, network, middleware, DBA, and infrastructure teams during incidents and releases.
- Perform health checks, server validation, process monitoring, and preventive maintenance activities.
- Support production deployment, rollback activities, and post-deployment validation.

Linux Administrator – Trendy Dice, Gurugram **May 2021 – Dec 2022**

- Administered Linux servers, user management, and system-level configurations.
- Installed and configured software packages and application environments.
- Monitored server health and application performance using Grafana and Prometheus.
- Performed troubleshooting for infrastructure and application-related issues.
- Worked with development teams to resolve server and environment issues.
- Managed routine operational activities, backups, and server maintenance.

INFRASTRUCTURE ENVIRONMENT

Technologies Managed: Linux Servers (RHEL/CentOS), AWS Cloud, NGINX, Kong API Gateway, Spring Boot Microservices, Oracle DB, Redis, Aerospike, Apache Kafka / Confluent Kafka, ELK Stack, Grafana, Prometheus, Elastic APM, Jenkins CI/CD, Bitbucket, HashiCorp Vault, Zoho ServiceDesk Plus (SDP), Shell Scripting, Ansible.

AWARDS & RECOGNITION

Certificate of Appreciation – Airtel Payments Bank (FY26-27, July 2026)
Awarded for demonstrating exceptional technical expertise, scripting excellence, and a strong sense of ownership, consistently delivering results while embracing new challenges with professionalism and reliability.

Certificate of Appreciation – Airtel Payments Bank (FY25-26)
For redeveloping bank-wide custom plugins for the new Kong version and delivering the upgrade on time.

Certificate of Appreciation – Airtel Payments Bank (FY25-26)
For ownership and commitment toward efficiency and reliability.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

EDUCATION

Master of Business Administration (MBA) – Finance
